[Your Firm Name]'S CHURCH ACCOUNTING SOFTWARE

Those who undertake the accounting responsibilities for a church know how difficult it is. You have to tackle the tedious process of collecting and counting funds, making deposits, updating accounting records, and recording charitable contributions (just to name a few!). So many facets of handling a church's finances are time-consuming and leave lots of room for error. [Your Firm Name] provides a simplified solution with automated church bookkeeping services that track church finances, so you can focus on what really matters.

MEET FINANCIAL ACCOUNTING STANDARDS

As a charitable organization, churches have specific accounting rules to follow. We understand most churches are required to prepare financial statements using the Statement of Financial Accounting Standards (SFAS) to accurately reflect their contributions and present their overall financial declarations. [Your Firm Name] integrates with accounting software already used, like QuickBooks, to learn the processes and provide a trained eye to make sure the church's finances are documented appropriately.
