

ACCOUNTING FOR DENTISTS

YOU RUN THE BUSINESS. WE'LL HANDLE YOUR BOOKKEEPING.

[Your Firm Name]'S DENTAL ACCOUNTING SERVICES

Dentists are in the business of educating their patients about oral health while creating beautiful, healthy smiles.

But when they decide to open their own practices, they take on the role of the business owner too. The responsibilities of working in their profession while effectively operating a business are incredibly challenging. That's why [Your Firm Name] is here to help.

SAVE TIME AND FOCUS ON PATIENTS

Dentists often find they lack the time to build their practices. They have to run reports and evaluate the performance of their businesses, manage team members, and find ways to increase profitability. We understand that for dentists to evaluate overall performance, they need to refer to their income statements, which determine cash flow into the practice, cash flow out of the practice, and the remaining balance. Inputting the data required to produce these essential financial documents is a tedious and time-consuming task. It's time to leave some of those worries to the pros. [Your Firm Name]'s dental accounting services organize your financial documents and make it easy to transition back to a more singular focus on oral health and pearly white smiles.

SUPERIOR AI AND SENIOR ACCOUNTANTS

We've tailored hundreds of dental bookkeeping services for dental practices and have decades of accounting expertise. With [Your Firm Name] you can:

- Monitor the accounts receivable and report on the financial health of the dental practice.
- Provide budgeting help and financial projections.
- Prevent scheduling gaps, ensuring that the scheduling practices support the financial goals.
- Provide comprehensive insights to the total monthly operational costs (equipment, supplies, payroll) of the dental practice.

AUTOMATE YOUR DENTAL BOOKKEEPING

Our automated dental bookkeeping solutions streamline the existing accounting practices by integrating with our client's current software and allowing more labor hours allocated to scale the practice. Drop the time-consuming administrative tasks and automate the bookkeeping with the help of our senior accountants and augmented intelligence (AI).

UNMATCHED QUALITY

With 99.97% accuracy, [Your Firm Name] gives you a complete financial picture that's always current, so you can make those important business decisions when they count.
